PART I
GENERAL CONSIDERATIONS

CAPITAL BUDGET REPORT—1973 FISCAL YEAR

General Considerations and Fiscal Summary

The Department of State Planning, under its basic legislative authority, serves as one of the Governor's principal staff agencies, and is assigned, primarily, two major budgetary responsibilities. They are: (1) Preparation of the Governor's annual capital budget, and (2) compilation of a proposed five-year capital improvements program for the State.

The Capital Improvements Division of the Department of State Planning is thus required to analyze, evaluate, recommend and schedule those projects of greatest urgency and importance operationally, from hundreds submitted, to ensure that the State's physical plant facilities keep pace with program needs and the demands of an ever increasing population. Such projects are carefully related to an integrated five-year development program. The program classifies projects in accordance with needs and recommends a time sequence for their construction. Also contained therein is the estimated cost of each project and an indication as to the probable operating and maintenance costs. In preparing the program, the Department of State Planning has the collaboration of the Department of General Services and the Department of Budget and Fiscal Planning.

To aid in the accomplishment of this task, the capital improvement programming procedure has been thoroughly formalized and is continually monitored to implement new innovations. It includes the preparation and distribution of detailed instructions and project submittal forms, application of space criteria, departmental hearings, and maintenance of close liaison with all State Agencies and institutions to thoroughly understand and evaluate programs and facility needs. To facilitate close coordination with the Legislature, members of the Capital Budget Committee of the Legislative Council participate in the on-site inspection trips and the annual departmental hearings.

Capital outlays in Maryland, except for highways and projects supported by revenue bonds, are financed primarily through issuance of general obligation bonds which pledge the full faith and credit of the State. These general obligation bonds, by constitutional provision must be amortized within a fifteen year period and they are fully secured by the State property tax. Essential capital needs must be provided; however, it is of utmost importance that such outlays be held within safe limits so as to maintain the State's long-standing triple "A" credit rating. Toward this end, certain categories of projects have usually been funded from general fund revenues, e.g., all capital projects costing \$100,000 or less, all equipment items and planning funds. However, because of the general economic situation during fiscal 1972 and its impact upon the State, general funds for this purpose are not available for fiscal year 1973.

Legal Requirements and Directives

Development of the annual capital budget and the State's capital program is subject to control in the form of legal requirements and other directives. Among the key legislative requirements concerning capital projects and procedures are:

1. State secretariats, departments and agencies shall transmit to the Secretary of State Planning a statement of all capital projects proposed to be undertaken for study, advice and recommendation by the Department of State Planning for consideration as an inclusion in the capital program of the State. Such secretariat, department or agency shall also, upon request, submit such information to the Department of State Planning and the Department of Budget and Fiscal Planning as these agencies may require in the preparation of the program. The Department of State Planning shall receive the assistance of the Department of Budget and Fiscal Planning in connection with the preparation of the annual capital budget. (Art. 88C, Sec. 6, Annotated Code of Maryland)
2. A project to be classified as a capital improvement shall have a useful life expectancy at least equal to the life of the bonds by which it is financed. (Art. 78A, Sec. 2, Annotated Code)
3. Monies derived from the sale of State construction bonds shall be used only for capital improvements and for no other purpose. (Art. 78A, Sec. 2, Annotated Code)
4. If a project has not been contracted for within two (2) years from the effective date of the General Construction Loan Act, then such project shall be deemed to have been abandoned. (Provided for in each General Construction Loan Act)
5. No work shall be started on any project without satisfactory assurances to the Board of Public Works that the project can be completed within the funds authorized. (A provision included in each General Construction Loan Act)
6. Unexpended funds remaining after a project is completed and accepted shall be applied to the reduction of the outstanding indebtedness of the State within one year after the date of final acceptance of the project by the State. (Art. 78A, Sec. 3, Annotated Code)
7. Each construction appropriation request submitted to the General Assembly for a permanent or long-time construction project must be accompanied with preliminary plans and specifications. (Art. 15A, Sec. 10, Annotated Code)
8. All requests by State agencies for capital projects shall be submitted to the Department of State Planning before July 1 of the fiscal year prior to the fiscal year in which they are to be commenced unless the requesting Department declares the project to be an emergency. (Art. 88C, Sec. 10, Annotated Code of Maryland)

9. No appropriations shall be authorized for preliminary planning funds unless the agency in question has submitted to the Department of State Planning a program describing in detail the purpose of the project for which funds are being requested. (Art. 88C, Sec. 10, Annotated Code of Maryland)
10. No changes shall be permitted in any project for which funds are requested after the preliminary plan has been completed and approved except upon the approval of the Secretary of the Department of State Planning and Secretary of General Services. (Art. 88C, Sec. 10, Annotated Code of Maryland)
11. No land shall be acquired for any State park which is in excess of the number of acres approved by the General Assembly for this park. The approval of the General Assembly shall be required for any revisions to the *Maryland Outdoor Recreation and Open Space Plan* prior to the initiation of any action to obtain additional land for any State park. (Art. 66C, Sec. 344B, Annotated Code of Maryland)

In addition to the foregoing specific legislative requirements, other directives have been issued which bear directly upon procedures and policies concerning budgeting and programming. They include:

1. A directive of the Governor specifies that members of the Secretariat and other heads of all State departments and agencies shall submit their capital budget requests to the Department of State Planning on or before July 1 of the new fiscal year. Each State department and agency shall reduce their supplemental requests to those projects deemed to be an emergency at the time of submission or which adversely affect the health and welfare of the citizenry of the State of Maryland, and which, by their very nature, could not be included by the aforementioned deadline. These specific requests must be submitted to the Governor through the State Department of Planning, for their detailed evaluation prior to his approval.

All departments shall continue to submit their proposed capital improvements projects constituting their five year program.

2. Toward the objective of strengthening long-range programming, the Governor also directed that the operating departments give renewed impetus to: (1) periodic review of their long range (10-year) capital improvements programs, and (2) specifically assign responsibility for such long-range programming within their agency.
3. Declaration of legislative intent, as follows:
 - (a) Items which properly belong in the operating budget of the State shall not be included in the annual capital budget, especially those as relate to repair and maintenance work, and minor equipment items. (See classification and Code of Objects of Expenditures, Budget Bureau, Department of Budget and Fiscal Planning)
 - (b) When an appropriation has been made for the preparation of preliminary plans and specifications for a capital project, such plans shall be

in the hands of the Department of State Planning for at least six months before that agency is authorized to recommend inclusion of construction funds for the project in a construction loan.

- (c) Disapproval is expressed by the Finance Committees of the General Assembly of action by members of the Secretariat and other heads seeking to by-pass the authority of the Department of State Planning by bringing rejected, deferred or unreviewed projects directly to the Finance Committees in a belated effort to have them included in the capital budget under consideration.
- (d) Bring into perspective the near term and future goals and supportive objectives through increased emphasis to long range planning through submittal of an updated 10-year development plan.

To assist the State departments and institutions in the development of their annual capital budget, projections of capital needs for the five-year period and a long range development program, the Department of State Planning has issued and distributed to all departments a revised series of Planning Instructions, issued July, 1971, which spell out procedure and include sample forms for the preparation and submission of capital project requests including a Long Range Development Program.

Capital Budget and Program Development

During the preparation of 1973 Fiscal Year Capital Budget, the Department of State Planning reviewed more than 310 individual projects submitted by some 50 major State agencies and institutions including those within the eleven established Secretariats. The estimated cost of these proposed projects approximate \$181,621,600. Individual project requests range from \$5,000 to \$6,108,900.

All projects requested for the fiscal 1973 Capital Budget were designated by the departments as urgently needed and assigned priority ratings to serve as helpful guides in the screening process. Those projects which relate to health, safety and welfare of the people are given high priority. Preparation of a capital budget that will fulfill department needs without undue sacrifice or impairment of functions is a difficult task. Parallel to these considerations is the responsibility of holding new debt formation within sound fiscal parameters.

This report includes a tabulation of all capital improvement projects, other than highways, non-State owned assets and those projects separately funded from the annual General Construction Loan, which various State agencies and institutions propose be undertaken during the five-year period, 1973-1977. This compilation of capital projects, presented in Part IV of this report, provides a longer range perspective as to future capital needs and the estimated costs of financing required.

Magnitude of Past and Projected Capital Needs and Basic Fiscal Data

During the 11-year period, 1961-1971, the General Assembly has authorized capital outlays aggregating \$1,158,114,658 exclusive of highway construction. Of this sum, \$589,488,658 was authorized for various state-owned facilities—

Higher and Special Education, \$267,451,235; Health, Hospitals, Mental Retardation and Juvenile Services, \$89,097,273; General Control (including Baltimore and Annapolis complexes), \$78,495,100; Transportation, \$68,421,200; Park Development and Acquisition, \$46,479,600; Public Safety and Correctional Services, \$34,647,150; and Economic and Community Development, \$4,897,100. The residual \$568,626,000 was authorized as direct grants for non-State owned facilities, largely to match local and federal funds in such areas as education, sanitation, water quality, nursing homes, housing, jail improvements, airport development, etc. The amortization cost (interest and repayment of principal) of these loans is borne by the State.

During the 1971 legislative session, funds authorized for State-owned capital assets increased by \$97,378,200, whereas authorized appropriations for non-State-owned capital assets increased \$179,525,000. Included in the latter figure is \$150,000,000 associated with the State takeover of the Public School Construction program for fiscal year 1972. An additional \$4,044,905 is to be provided through the Area Vocational School Construction Loan funds. The State subdivision's proposed six year (fiscal 1972-1977 inclusive) public school construction program totals in excess of 1.3 billion dollars. Funding of the Public School Construction program and other non-State-owned projects are generally separate from the regular capital budget of the State agencies and institutions, the latter which are financed through the General Construction Loan and General Funds, when such funds are available.

The following tabulation summarizes for the past five years the projected five-year capital programs submitted by the various State agencies and institutions as well as the annual capital budget requests and the annual capital appropriation authorized by the General Assembly:

Fiscal Year	Five Year Capital Program Submitted by Departments	Projects Requested for Annual Capital Budget	Annual Capital Budget Appropriations Authorized by the General Assembly			
			Bonds	Funds	General Funds	Total
1972	\$453,516,000	\$150,825,500	\$104,703,200		\$104,703,200
1971	387,000,000	121,697,600	58,963,800	\$9,799,000		68,762,800
1970	301,700,000	108,000,000	73,493,200		73,493,200
1969	259,898,800	90,000,000	57,453,600		57,453,600
1968	224,750,400	85,000,000	48,700,700	5,844,623*		54,545,323

* Because of the decreased revenues estimated due to tax reform measures enacted in 1967 Session of the General Assembly \$4,215,177 had to be cancelled. As a consequence, only \$5,844,623 in capital outlay, or 10%, of the total was actually so financed.

During Fiscal 1973, State agencies and institutions initially submitted requests as urgently needed totaling \$346,754,200 for inclusion in the fiscal 1973 capital budget. Subsequent adjustments reduced the total to \$181,621,600, the major deletion being \$160,000,000 which was to provide State grants which will supplement Federal grants to communities to aid in construction of sewerage facilities. This latter amount is not needed during the upcoming year and will be subsequently funded, in whole or in part, through a State of Maryland special bond authorization. Also excluded from the above figures are the proposed projects associated with the Public School Construction program for fiscal 1973 which are to be financed through a separate bond bill.

Initially, the Five-Year Capital Program, 1973-1977, requests aggregated \$737,218,500 with a subsequent downward adjustment to approximately \$583,347,900.

The estimated five-year capital program total of \$583,347,900 indicates an average annual rate of capital outlay of \$116,669,600. Five years ago, the average annual proposed capital expenditures approximated \$44,950,000. Last year this rate approached \$90,703,000. Continued construction demands for the Baltimore and Annapolis complexes as well as inflationary factors represent important elements in the increase during the current year. Apropos of this, it should be noted that during the five years 1966-1971, Maryland's population increased approximately 11%.

There exists, along with the increasing demand for State facilities, impetus to provide new and expanded programs and services, private and other, outside the State's capital budget. This involves the issuance of State bonds to provide direct grants in some cases and in others the use of the State's credit to finance non-State owned facilities. The state's takeover of public school construction and implementation of the new District Court system represent two examples. In the three-year period 1969-1971, State bonds in the amount of \$387,335,000 were authorized by the General Assembly for the construction of non-State owned facilities. Of this amount \$261,500,000 represents use of the State's credit and is repayable. The remaining \$125,835,000 represents direct grants. The growth of these bond authorization proposals, other than the State's general construction loan, led to the current procedure for their review. The procedure is supported by the Joint Budget and Audit Committee. The Department of State Planning, with the assistance of the Department of General Services, the Department of Budget and Fiscal Planning, and the office of the Comptroller review and evaluate all proposals of bond bills involving the authorization of State general obligation bonds and reports its findings and recommendations simultaneously to the pertinent committee of the General Assembly and the Governor.

Basic Fiscal Data

The data presented in this section are useful in evaluating the State's fiscal position. It should be remembered that in referring herein to the State's debt, the figures are exclusive of highway obligations which are serviced entirely by the dedicated highway use taxes and toll revenues.

As previously pointed out, capital projects of the various State agencies and institutions are financed by State general obligation bonds which are supported by the State property tax levy. Constitutional provision fixes the term of these bonds at 15 years. It is significant that for many years the State of Maryland has continuously maintained a triple "A" rating on its general obligation bonds.

As of June 30, 1971, State bonds outstanding aggregated \$720,832,000. As of the same date, bonds "authorized and unissued" totalled \$745,570,907. Thus, at the close of the 1971 fiscal year, the total State debt authorized amounted to \$1,466,402,907. It should be noted that the State debt continues to be authorized at a much faster pace than is being issued, retired or cancelled.

Included in the "authorized but unissued" figures are sizeable loans for General Public School Construction, Maryland Port Authority, Outdoor Recreation Land

Loans, State Roads Commission and State Public School Construction and Capital Improvement Program, Sanitary Facilities, Water Quality, Dredging Spoil, Area Vocational School Construction and Maryland Housing loans. The General Public Junior and Community College Construction Loan of 1971 for \$15,000,000 and the Harford County Jail Loan of 1969 amended and increased \$200,000 were both effective July 1, 1971 and are not included.

The total "authorized but unissued bonds" as of June 30, 1971 increased by 46% as compared to the amount last year and are as follows:

Loan	Date	Amount
Sewage Treatment Works Loan	1962	\$ 400,000
Area Redevelopment Loan	1963	150,000
General Construction Loan	1964	842,551
General Public Junior or Community College Loan	1964	449,802
General Construction Loan	1965	997,943

General Construction Loan	1970	55,632,454
Mine Reclamation and Water Quality Restora- tion Loan	1970	4,000,000
General Public Junior or Community College Construction Loan	1970	3,860,000
Urban Mass Transit Loan	1970	5,000,000
General Public School Construction Loan	1970	14,515,000*
General Construction Loan	1971	104,703,200
Maryland Housing Fund Loan	1971	7,000,000
Provident Hospital Loan	1971	1,500,000
State Public School Construction and Capital Improvement Loan	1971	150,000,000*

Total—Authorized but Unissued Bonds as of
June 30, 1971 \$745,570,907²

* These loans are not supported by the State property tax.

¹ These loans remain valid enactments until repealed by the General Assembly or declared invalid by any court in the State of Maryland.

² Does not include General Public Junior or Community College Construction Loan of 1971, \$15,000,000.00; effective July 1, 1971, Chapter 350 of the Acts of 1971. Does not include Harford County Jail Loan of 1969 Amendment, \$200,000.00; effective July 1, 1971, Chapter 759 of the Acts of 1971.

Of the \$745,570,907 bonds authorized but unissued \$344,162,964 or 46.3 per cent represent appropriations for State-owned projects. The remaining 53.7 per cent is for various local public and private facilities including schools, hospitals, community and private colleges, water and sewerage projects, mine reclamation, Urban Mass Transit.

During the 1971 session of the General Assembly total bonds authorized to finance capital outlays aggregated \$278,403,200, an increase of 86.5 per cent as compared to the bonds authorized the preceding year. Of this sum \$181,025,000 in bonds were authorized for non-State owned improvements; \$90,250,000 in bonds were allocated in 1970; \$123,385,000 in bonds were so allocated in 1969; \$147,000,000 in 1968.

The table shown below reflects the growth in the State's outstanding debt during the past five years, both in total and excluding the loans not supported by the State property tax, i.e., those loans which will be repaid the State. The latter loans outstanding as of June 30, 1971 totalled \$263,274,000 and account for 36 per cent of the total outstanding debt.

Ending June	Total Debt Outstanding	Increase Since 1966 Fiscal Year	Per Cent Increase	Debt Outstanding Excluding Loans Not Supported By State Property Tax	Increase Since 1966 Fiscal Year	Per Cent of Increase	Per Cent Total
1971	\$720,832,000	\$346,273,000	92	\$457,558,000	\$240,394,000	111	63
1966	374,559,000			217,164,000			58

The above table discloses that the total State debt outstanding, as well as the debt incurred that is supported by the State property tax, have each increased

during the past five years by 92% and 111% respectively, or about 18% and 22% respectively per year. In juxtaposition thereto, the assessable base during the same period has steadily increased from \$13,796,508,000 for the taxable year 1966 to \$19,981,045,000 for the taxable year 1972 at an average annual rate of approximately 9%. Currently, the ratio of total State debt to the assessable base is 3.90%.

During the 1971 fiscal year, there were four sales of State general obligation bonds totalling \$194,720,000. The net interest cost on the bonds paid decreased from 6.028% in July 1970 to 4.1964 in March 1971. The latest Bond sale in October 1971 reflected a rate of 4.111%, down from 4.97257 in July 1971.

The following tabulation shows the variation in the net interest costs to the State on each sale of bonds between November 1966 and October 1971.

Bond Sales & Interest Cost

<u>Date of Bond Sale</u>	<u>Net Interest Cost</u>
October 1971	4.1110%
July 1971	4.97257
March 1971	4.1964
December 1970	4.3868
October 1970	5.2872
July 1970	6.028
April 1970	5.232
January 1969	4.325
July 1968	3.949
January 1968	4.224
July 1967	3.667
February 1967	3.136

Other pertinent fiscal data are reported below:

Assessable Base and State Property Tax Rate

<u>Taxable Year</u>	<u>Fiscal Year</u>	<u>Assessable Base</u>	<u>Per Cent Annual Increase</u>	<u>Per Cent Increase Since 1967 Fiscal Year</u>	<u>State Property Tax Rate Per \$100 of Assessed Valuation</u>
1972	1972	\$19,981,045,000	8.0	40.9	18.00¢
1971	1971	18,496,971,000	8.5		18.00

Fiscal Year Ending June 30	Total Debt Retirement	Debt Retirement Excluding Public School Construction and Other Loans Not Supported By State Property Tax
1972	\$48,696,000	\$29,518,000
1971	42,226,000	20,092,000
1970	39,166,000	17,511,013
1969	34,178,000	14,827,421
1968	31,662,000	18,284,391

Disbursement for Debt Service

Fiscal Year Ending June 30	Redemption and Interest on Total Debt Outstanding	Debt Service Charges Being Repaid the State	Redemption and Interest Excluding Public School Construction and Other Loans Not Supported By State Property Tax
1972	\$80,096,974	\$30,759,641	\$49,337,333
1971	62,495,891	28,932,508	33,563,383
1970	58,277,133	24,954,481	33,322,652
1969	50,249,532	21,074,395	29,175,137
1968	45,633,063	19,027,714	26,605,349

Highlights:

The fiscal data reported herein disclose the following pertinent facts:

	<u>Fiscal Year June 30, 1971</u>	<u>Fiscal Year June 30, 1970</u>
1. Total State Debt Out- standing	\$ 720,832,000	\$ 568,215,000
Supported by State Property Tax	\$457,558,000	\$304,635,000
Not supported by State Property Tax	263,274,000	263,580,000
Total Bonds "Author- ized but Unissued"	745,570,970	712,447,006
Supported by State Property Tax	514,545,907	538,022,006
Not supported by State Property Tax	231,025,000	174,425,000
Total State Debt Already Authorized	\$1,446,402,907	\$1,280,662,006

2.

Total General Obligation Bonds Authorized By General Assembly (1971-1969)	Non-Repayable Grants	State Facilities	Use of State's Credit (Repayable)
\$624,495,200	\$125,835,000	\$237,160,200	\$261,500,000

Apropos of the aforementioned, it should be noted that State bonds authorized for the construction of non-State-owned facilities increased as follows:

Three Year Period	Amount
1971-1969	\$376,085,000
1970-1968	369,195,000
1967-1965	220,426,000

3.

<u>Outstanding Total State Debt</u>	<u>Fiscal Year 1971</u>	<u>Fiscal Year 1966</u>	<u>Increase</u>	<u>Per Cent Increase</u>
	\$720,832,000	\$374,559,000	\$346,273,000	92
(a) Supported by State Property Tax	457,558,000	157,395,000	300,163,000	191
(b) Not Supported by State Prop- erty Tax	263,274,000	217,164,000	46,110,000	21

4. Bonds Authorized But Unissued—June 30, 1971:

<u>Total</u>	<u>Non-State-Owned Facilities</u>	<u>Per Cent</u>	<u>State-Owned Facilities</u>	<u>Per Cent</u>
\$745,570,907	\$401,407,943	54	\$344,162,964	46

The figure of \$401,407,943 for non-State-owned facilities represents a decrease of 4 per cent from the previous year.

The State's assessable base continues its steady growth having advanced from \$14,181,962,000 for taxable year 1966-1967 to \$19,981,045,000 for the current taxable year 1972. The increase has been, at an average rate, approximately eight per cent per year. Since 1966-1967 taxable year, the assessable base has increased 40.9 per cent. This steady growth in the assessable base indicates the sound growth of the overall economy of the State.

The ratio of debt outstanding to the assessable base as of June 30, 1971 was 3.90 per cent. During the last five years this ratio has increased from 2.91 per cent in 1967 to 3.90 per cent in fiscal year 1971.

5. Bond Retirements and Disbursement for Debt Service

During the 1972 fiscal year, State general obligation bonds in the amount of \$48,696,000 will be retired, of which \$29,518,000 represents bonds serviced by the

State property tax. Disbursements for debt service (redemption and interest) during this period will total \$80,096,974. Of this amount \$30,759,641 represents debt service charges being repaid the State.

The fiscal position of the State remains healthy as indicated by the continuance of the triple "A" rating assigned to the State's latest bond issues.

In conclusion, to effectively fulfill the ever increasing needs for State-owned facilities and to insure a measure of stabilization in the State's structured indebtedness, careful attention should be given to (1) the magnitude of total bonds "Authorized but Unissued" (potential debt), (2) the issuance of bonds to provide direct grants to non-State-owned facilities, (3) further extension of the use of the State's credit to local subdivisions and/or sanitary districts and medical facilities and (4) maximum use of pay-as-you-go funding as an alternative to general obligation bond financing.

PART II

CAPITAL BUDGET FOR 1973 FISCAL YEAR

PART II
CAPITAL BUDGET FOR 1973 FISCAL YEAR

The 1973 Fiscal Year Capital Budget proposed by the Governor is presented in complete detail in this section. A budget summary, both by departments and by major function, is also included. An important consideration is the effect that the proposed capital budget will have upon the State's operating budget in future years. This, too, is indicated in total for all increases of \$1,000 or more, and individually under each project where appropriate in the text.

1973 CAPITAL BUDGET

The 1973 Capital Budget proposed herein includes 160 individual projects totaling \$74,464,000. Fifteen projects with costs in excess of \$1,000,000 account for \$42,090,700 of the total budget and four of these projects alone total \$20,144,000.

The capital outlays herein proposed will again provide many types of needed improvements to maintain and further upgrade State services and to provide facilities in keeping with continuing institutional programs at a high level for the citizens of Maryland. Especially noteworthy are: Construction of a Legislative Services Building in Annapolis; an additional Unit to building, known as the Natural Resources complex, for Statewide District Court, District Court for Annapolis, Public Defender for Anne Arundel County, and other State agencies; detailed plans for a 250-bed Regional Mental Health Hospital in Western Maryland, Department of Mental Hygiene; preliminary plans for a 150-bed Western Maryland Regional Mental Retardation Center and funds for purchase of two Group Home subunits, Directorate of Mental Retardation; construction of an Infirmary and Isolation Building, Montrose School for Girls; construction of a 100-bed Security Institution, Department of Juvenile Services; Construction of a Hospital Building, Maryland House of Correction; construction of a new Dining Hall, Kitchen and Bakery Building at Maryland Penitentiary; construction of a new Berlin Post, Maryland State Police; construction of an Office-Classroom Building, University of Maryland, College Park Campus; construction of additions to Academic Building No. 2, University of Maryland, Baltimore County Campus; supplemental funds for the State College Dormitory Fund in the amount of \$2,500,000; construction of new Library, Frostburg State College.

In addition, the 1973 Fiscal Year Capital Budget provides approximately \$5,238,000 for planning and continued development of parks and recreational facilities throughout the State. Funds for land acquisition projects of the Department of Natural Resources under the Outdoor Recreation Land Loan of 1969 (Program Open Space) will aggregate approximately \$7,000,000.

The detailed capital budget sets forth each project along with a brief explanatory statement concerning the project. Preliminary plans for major construction projects are presented in a SUPPLEMENT to this report, which is published as a separate document.

Capital Budget Summary by Department and by Major Function

A departmental summary of the proposed 1973 Capital Budget is as follows:

Department or Agency	PROPOSED 1973 CAPITAL BUDGET	
	Bond Funds	General Funds
Board of Public Works	\$13,204,600	
Military Department	562,400	
Department of Natural Resources:		
Fish and Wildlife Administration	762,000	
Department of Forests and Parks	5,238,200	
Department of Health and Mental Hygiene:		
State Department of Health	74,000	
Department of Mental Hygiene	5,841,300	
Directorate of Mental Retardation	762,400	
State Department of Juvenile Services	4,313,500	
Department of Public Safety and Correctional Services:		
Division of Correction	\$ 4,069,000	
Patuxent Institution	343,000	
Department of Maryland State Police	576,100	
University of Maryland	20,508,200	
State Colleges	16,878,700	
St. Mary's College of Maryland	147,000	
Maryland School for the Deaf	1,105,600	
Department of Economic and Community Development:		
Maryland Historical Trust	78,000	
GRAND TOTAL 1973 CAPITAL BUDGET APPROPRIATIONS	\$74,464,000	

By major functions, the proposed 1973 Capital Budget is divided as follows:

Function	Amount	Per Cent of Total
General Control	\$13,282,600	17.8
Public Safety	1,138,500	1.5
Natural Resources and Recreation	6,000,200	8.1
Health, Hospitals, Mental Hygiene and Juvenile Services	10,991,200	14.8
Correction	4,412,000	5.9
Higher and Special Education	38,639,500	51.9
TOTAL	\$74,464,000	100.0

The above table discloses that Higher and Special Education, again, are receiving over 50% of the total capital budget. The categories of General Control and Health, Hospitals, Mental Hygiene and Juvenile Services account for an additional 32% of the total capital budget. Indications are that this trend will continue during the next few years.

Effect Major Capital Projects in the Capital Budget Will Have on Future Operating Budgets

Capital outlays for new or expanded facilities almost invariably bring about an increase in the operating budget of the State in future years. It is of utmost importance, therefore, to determine what effect the proposed capital budget will have upon operating expenses in the future and all departments are required to furnish this information. Based on the data furnished by the departments, the estimated increase attributable to this proposed capital budget is shown below for increases of \$1,000 or more:

Estimated increase in Salaries and Wages	\$13,405,000
Estimated increase in Other Operating Expenses	3,255,700
	<hr/>
TOTAL	\$16,660,700

1973 FISCAL YEAR CAPITAL BUDGET

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

BOARD OF PUBLIC WORKS:

(1) Annapolis:

- | | |
|--|------------|
| 1. Installation, final phase, of security system for State House Complex, including Government House and additional security for Income Tax Building Computer Center | \$ 650,000 |
|--|------------|

This project is required to complete the electronic security and surveillance system for all existing buildings and those under construction. The system now covers the Governor's Mansion, State House, Income Tax Building, Tunnel and certain exterior outlets.

- | | |
|--|---------|
| 2. Measures to correct fire and safety deficiencies and other necessary renovations in existing buildings of the State House Complex | 500,000 |
|--|---------|

Funds recommended are necessary to accomplish the following: a—Correct fire and safety deficiencies specified as necessary by the State Fire Marshal; b—Varied necessary improvements to State Buildings. This work has been phased for accomplishment over a period of years. All projects constituting the program are reviewed by the Department of General Services to substantiate necessity for accomplishment.

- | | |
|---|---------|
| 3. Equipment for New Court of Appeals Building: | |
| State Library | 106,900 |
| Judicial Facilities Furnishings | 103,700 |

The new Court of Appeals Building will be completed by the time these funds become available. The equipment is necessary to place facilities being provided in full operation.

- | | |
|---|-----------|
| 4. Construction of Legislative Services Building | 5,365,000 |
| Estimated increase in operating expense: | |
| Salaries and wages | \$82,500 |
| Other operating expense | 82,500 |

The building is required to provide necessary facilities for the Department of Legislative Reference and the Department's Library, Department of Fiscal Services, Press and Radio space,

BOARD OF PUBLIC WORKS—(Continued):

Annapolis—(Continued):

Attorney General's offices, space for Code Revision Group, large combined Legislative Hearing Room, Print Shop, Bill Room, First Aid space, General Cafeteria, and a Legislative Cafeteria.

- 5. Completion of alterations to the Senate Office Building (former Treasury Building) \$ 100,000

Funds recommended are required for renovations to provide four additional hearing rooms, large lounge, and office suites for senators not presently housed in the building.

- 6. To supplement the appropriation "Construction of a House of Delegates Office Building" as shown on page 905 of the Acts of 1971; Section 8 of Chapter 425 of the Acts of 1971 being hereby modified to the extent that said work may be undertaken upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose 1,450,000

Need for additional funds stems primarily from the original estimate being low, price escalation and the addition of offices on the 4th floor.

- 7. Extension of utilities to new Legislative Services Building and House of Delegates Office Building 152,000

The cost estimate for construction of these two new buildings does not include the cost of extending utilities to the buildings.

- 8. Design and preparation of detailed plans and specifications for an underground parking garage in the old Armory area on Bladen Street (200 cars) 55,000

New construction approved for the College Avenue-Bladen Street area eliminates former parking space. This project initiates providing parking space planned for the Senate and personnel that will occupy new office space in the immedi-

PROPOSED CAPITAL BUDGET

Method of Financing

Bond Funds General Funds

BOARD OF PUBLIC WORKS—(Continued):

Annapolis—(Continued):

ate area. The area over the garage will be landscaped as an open space area in consonance with providing a scenic approach to the Capitol.

- 9. Landscaping and screening of Rowe Boulevard between College Creek and new State Police Barracks \$ 50,000

This project is a part of landscaping and screening necessary to provide the scenic approach to the State Capitol area planned and approved in connection with expansion of State office facilities in Annapolis.

- 10. Erection of two surplus Greenhouses and construction of a headhouse addition 27,000

At present, flowers and the varied other plantings required for site improvement of State property in Annapolis must be purchased. The State has two surplus greenhouses at the Maryland House of Correction. The Department of General Services advises that a saving to the State can be realized through placing these two greenhouses in operation in Annapolis. It is planned to locate the greenhouses in the general area behind the new State Police Barracks where they will be screened from Rowe Boulevard.

- 11. Construction of additional Unit to building, known as the Natural Resources Complex, for Statewide District Court, District Court for Annapolis, Public Defender for Anne Arundel County, and other State agencies 1,750,000

District Court facilities are either nonexistent or inadequate in various areas of the State. As a temporary stopgap, rental space is being pressed into use on a make-do basis. A construction program is in the process of being drafted for construction of necessary court facilities throughtout the State in order of priority based on adequacy of temporary rental space. This

BOARD OF PUBLIC WORKS—(Continued) :

Annapolis—(Continued) :

is the first project in this category. Funds recommended will permit construction of a Unit addition to the new Natural Resources Complex providing 46,000 sq. ft. on four floors and basement. This Unit is one of two units included in the plans for the complex to fill future space needs. Space will be available in this unit to fill needs of other State agencies now in temporary rental space.

- 12. Purchase and installation of mechanical equipment for heating and cooling required for additional units to Natural Resources Complex... 350,000

This project is required to provide sufficient heating and cooling capacity to service the new Unit recommended as Project 11 above.

(2) Baltimore:

- 1. To supplement the appropriation "Expansion of the Central Utility Plant to provide electric heating and air conditioning for existing and planned State Governmental Center, Baltimore" as shown on page 907 of the Acts of 1971; Section 8 of Chapter 425 of the Acts of 1971 being hereby modified to the extent that said work may be undertaken upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose 1,795,000

The cost of this project has increased due to: a—necessity for excavation going deeper than originally contemplated; b—The Baltimore Gas and Electric Company changed the electric feeder requirements which in turn necessitated use of more costly electrical equipment; and c—Escalation in cost of materials and labor.

- 2. To supplement the following: (I) the appropriation "Planning and preparation of detailed plans and specifications for a new State Cen-

BOARD OF PUBLIC WORKS—(Continued):

Baltimore—(Continued):

tral Laboratory, etc.” as shown on page 1678 of the Acts of 1967; (II) the appropriation “Contingent upon and supplementary to federal funds being made available to the State Department of Health for construction of a new State Laboratory, Baltimore, etc.” as shown on page 633 of the Acts of 1968, Section 10 of Chapter 435 of the Acts of 1968 having been waived by Chapter 512 of the Acts of 1970 to provide that the time within which the capital improvements set forth in Section 10 of said Chapter 435 must be placed under contract be extended for an additional period of two years from June 1, 1968; (III) the appropriation “Construction of 3-level Parking Facility beneath new State Office Building Quadrangle including a State Department of Health Laboratory Building” as shown on page 994 of the Acts of 1969; (IV) the appropriation “To supplement the appropriation ‘Contingent upon and supplementary to federal funds being made available to the State Department of Health for construction of a new State Laboratory . . .’ etc.” as shown on pages 335 and 336 of the Acts of 1970; (V) the appropriation “Construction of two State Office Buildings and supplemental funds for the following, etc.” as shown on pages 906 and 907 of the Acts of 1971; Section 8 of Chapter 759 of the Acts of 1967 and Section 8 of Chapter 435 of the Acts of 1968 and Section 8 of Chapter 409 of the Acts of 1969 and Section 8 of Chapter 101 of the Acts of 1970 and Section 8 of Chapter 425 of the Acts of 1971 being hereby modified to the extent that said work may begin upon satisfactory assurances to the Board of Public Works that said projects can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose \$ 750,000

In order to place construction of Quadrangle I under contract within the limits of funds pre-

viously appropriated it was necessary to provide alternates. The contractor has agreed to re-install the alternates in the contract at no increase in the bid cost if necessary additional funds are made available. Funds recommended herein will enable reinstallation of alternates considered essential.

TOTAL—BOARD OF PUBLIC WORKS		\$13,204,600
-----------------------------------	--	--------------

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

MILITARY DEPARTMENT:

1. Contingent upon and supplementary to federal funds being made available to the Military Department for the Construction of an Armory—Gunpowder River Valley State Park area:

Construction	\$ 286,400
Reimbursement of Revolving Preliminary Planning Fund	36,000

This project will fund a second new armory and thereby allow the Military Department to continue implementation of its unit consolidation program. The armory will be the home station for the Special Forces Unit located at Towson and some units now located at Pikesville and the Fifth Regiment Armory. The facilities these units presently occupy do not provide adequate space for training and storage of equipment. Funds recommended herein will provide for the 25% State share of the construction costs. Federal funds provide the remaining 75% of the funds required.

2. Site improvements for White Oaks Armory 90,000

This project is required to provide off-street parking, walks, security lighting, curbs, storm drains and security fence for the new armory building.

4. Acquisition of land and design and preparation of detailed plans and specifications for construction of an Armory, Trappe-Easton area (approx. 10 acres) 90,000

This new armory will replace the Easton Armory and the Cambridge Armory. These armories were constructed in 1917 and now require extensive renovation. The new armory will become the third phase of the Department's unit consolidation program. Federal funds will finance 75% of the construction costs. The two existing armories will be available for sale when the construction of the new armory is completed.

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

MILITARY DEPARTMENT—(Continued) :

- | | |
|---|--------------|
| 6. Construction of hard surface off-street parking area at the Pikesville Military Reservation (198 spaces) | \$ 60,000 |
|---|--------------|

Off-street parking is urgently needed. The National Guard members now must park their privately owned vehicles on the street in a highly congested area. This creates a traffic problem. The situation is particularly critical on drill nights and whenever the Guard is called for civil disturbance duty. During fiscal year 1971, the armory rental fees amounted to approximately \$6,000. Off-street parking would probably attract additional rental customers.

TOTAL—MILITARY DEPARTMENT	\$ 562,400
---------------------------------	---------------

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

FISH AND WILDLIFE ADMINISTRATION:

1. Final phase construction of Matapeake Multi-Use Field Station \$ 402,000

Estimated increase in operating expense:
 Salaries and wages \$5,400
 Other operating expense 1,800

The above funds are required to complete the construction of a boat repair facility, police training center, shore erosion measures, roads, parking area and site improvements; the renovation of existing brick building for laboratories and field offices; the metal storage sheds for buoy storage and maintenance; and razing the old terminal office building.

2. Construction of addition to Beaver Creek Cold Water Fish Hatchery 360,000

Estimated increase in operating expense:
 Salaries and wages None
 Other operating expense \$10,000

Due to the nature and cost of the project, funds are requested from the General Construction Loan to finance this request to insure its timely completion. Since special license fees and other income received by the Fish and Wildlife Administration are eligible to finance this type of project, the cost of the project shall be amortized with these fees. The fish hatchery addition will double Maryland's production of trout and will reduce the unit cost of trout by 40%. It will eliminate the State's dependence upon federal hatcheries for trout to stock our rivers and streams.

TOTAL—FISH AND WILDLIFE ADMINISTRATION \$ 762,000

DEPARTMENT OF FORESTS AND PARKS:

The Maryland park facilities are presently unable to accommodate the total demand for recreation areas. Attendance at the State's parks has increased steadily. During the past five years there has been an approximate 200% increase in visitors. To cope with this increased recreational demand, the Department of Forests and Parks has recommended a minimum park development program for fiscal years 1973 through 1982 amounting to \$148,900,000. The objectives of this program are:

- (1) to provide user facilities throughout the State with special emphasis in those areas closest to population centers that have the greatest deficiencies in facilities;
- (2) to concentrate the available funds in fewer complete operational units in order to allow for a more efficient development program and provide for user benefits at the earlier date.

The fiscal year 1973 capital requests submitted by the Department of Forests and Parks consists of twelve development and planning projects at an estimated cost of \$10,294,200. Of these project requests, eight totaling \$9,694,200 are for park development and four totaling \$600,000 are for design funds.

As of December 3, 1971, \$9,064,600 for planning and development remain unencumbered from prior appropriations. Of this amount approximately \$4 million are currently under design or in the process of being bid. These funds and the funds currently being proposed in the 1973 fiscal year capital budget total \$14,302,800. The recommendations for development and planning are consistent with the Master Plan of Development.

The estimated increase in operating expenses associated with the development projects recommended herein is \$63,900 for salaries and wages and \$7,700 for other operating expenses.

PROPOSED CAPITAL BUDGET

Bond Funds General Funds

DEPARTMENT OF FORESTS AND PARKS—(Continued):

The appropriations listed below for the Department of Forests and Parks are recommended for approval.

- (1) Cedarville State Park:
(Prince George's and Charles Counties)
- 4. Design and preparation of detailed plans and specifications for construction of the Day-Use Beach area to include roads and parking areas, park buildings and facilities, water treatment plant and storage tank, beach development and miscellaneous work \$ 160,000
- (2) Cunningham Falls State Park:
(Frederick County)
- 3. Construction of Family Camping Facility area:
 - Roads (25,000 L. F.) 740,700
 - Campsites (280) 125,500
 - Water distribution 115,000
 - Dump Station for sewage 13,500
 - Shower buildings 394,200
 - Registration building 24,600
 - Camp store 46,000
 - Design fees for camping facility 57,700
 - Contingencies fees 57,700
 - Design fees for second unit 100,000
- (3) Gunpowder River Valley State Park:
(Baltimore County)
- 7. Design and preparation of detailed plans and specifications for park development in the upper Gunpowder River area to include roads, parking areas, utility systems and facilities for the picnicking, camping and nature study activity areas 200,000
- (4) Patapsco State Park:
(Howard and Baltimore Counties)
- 2. Design and preparation of detailed plans and specifications for park development in the new Hollofield Area to include roads, parking areas, utility systems and facilities to support the picnicking, hiking trails and activity areas 200,000

(3) Western Maryland State Hospital:

- | | |
|---|--------|
| 29. Design and preparation of detailed plans and specifications for air conditioning of Hospital | 34,000 |
|---|--------|

Chronic Disease Hospitals care for paraplegic and quadraplegic patients who cannot control their own body temperatures. It is therefore necessary to control the temperature in living, dining, and treatment areas. In addition, this Hospital has a large number of bed-ridden geriatrics due in part to recent transfers from Springfield State Hospital. The other State chronic disease hospitals have been air conditioned as a part of a phased program. Recommend approval of this project.

PROPOSED CAPITAL BUDGET

Method of Financing

Bond Funds General Funds

DEPARTMENT OF MENTAL HYGIENE:

(1) Headquarters:

2A. To supplement the appropriation "Construction of a Comprehensive Community Mental Health and Retardation Center (200 beds) Baltimore" as shown on page 1678 of the Acts of 1967, Section 10 of Chapter 759 of the Acts of 1967 having been waived by Chapter 318 of the Acts of 1969 and Chapter 243 of the Acts of 1971 to provide that the time within which the capital improvements set forth in Section 10 of said Chapter 759 must be placed under contract be extended for an additional period of two years from June 1, 1969 and an additional period of 2 years from June 1, 1971 respectively; Section 8 of Chapter 759 of the Acts of 1967 being hereby modified to the extent that said work may be undertaken upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose \$ 3,305,000

A revised estimate made by the architect in August 1971 indicated that \$3,386,000 additional to State and Federal funds previously appropriated would be required. Deductible alternates which were considered acceptable, reduced supplemental funds required to \$3,305,000. Plans for the center will be ready to be placed for bid about February 1972. Funds proposed herein are necessary to get the center under contract.

11. Contingent upon preliminary plans being first approved by the Department of General Services and the Department of State Planning—Design and preparation of detailed plans and specifications for a Regional Institute for Children (140 beds) including air conditioning, Rockville area 130,000

Montgomery County is providing land at a new location which will necessitate extending utilities a greater distance than originally anticipated. The Department of General Services

PROPOSED CAPITAL BUDGET

Method of Financing

Bond Funds General Funds

DEPARTMENT OF MENTAL HYGIENE—(Continued):

Headquarters—(Continued):

advises that preliminary plans can now be completed in approximately 90 days. Contingent upon preliminary plans being first approved by the Department of General Services and the Department of State Planning, it is recommended that this project be included in the fiscal year 1973 capital budget.

- 20. Contingent upon preliminary plans being first approved by the Department of General Services and the Department of State Planning—Design and preparation of detailed plans and specifications for construction of a Regional Mental Health Hospital (250 beds) including air conditioning, Western Maryland \$ 225,000

Allegany County is in the process of obtaining an option on land, which option can be exercised during next year. The Program presently calls for separate structures for: 24 children and adolescents; 24 alcoholic patients; 5 units of 20 geriatric beds each for treatment and activity space; 5-18 bed units for adult psychiatric patients; a 12-bed infirmary; Administrative and support services Building; Maintenance Building; Swimming Pool and Auditorium-Gym. Work is in progress to reduce multiple costly buildings and facilities. Recommend providing detailed plans funds contingent upon completion of preliminary plans approved by the Departments of General Services and Planning.

Total—Headquarters \$ 3,660,000

(2) Crownsville State Hospital:

- 9. Installation of fire sprinkler protection in various areas 78,000

This project is required to eliminate fire hazard and deficiencies specified by the State Fire Marshal.

- 32. Preparation of detailed plans and specifications for replacement of hot and cold water lines in

PROPOSED CAPITAL BUDGET
Method of Financing
Bond Funds General Funds

DEPARTMENT OF MENTAL HYGIENE—(Continued):

Crownsville State Hospital—(Continued):

Meyer Building and steam piping lines in Men's
Dormitory \$ 10,000

This project requires investigation and detailed plans based thereon to determine actual needs and arrive at a realistic cost estimate. Accordingly, detailed plans are recommended.

56. Completion of design and detailed plans and specifications for construction of Geriatric Building (200 beds) including air conditioning 34,000

Preliminary plans for this project have been completed. Presently geriatrics are housed in the Winterode Building, which building is most unsatisfactory in all respects and will be razed when the new building is completed. General Funds available for design of this project are insufficient. Approval of this project will permit completion of detailed planning.

Total—Crownsville State Hospital \$ 122,000

(3) Eastern Shore State Hospital:

10. Installation of fire prevention facilities in various buildings 32,000

Funds recommended will provide for correcting deficiencies specified by the State Fire Marshal.

35. Design and preparation of detailed plans and specifications for construction of addition to Medical-Surgical Building, renovation of Center Wing, and air conditioning of entire building 57,000

The addition and renovation will provide badly needed storage facilities for ward supplies and equipment; enlarged pharmacy to handle today's varieties and amounts of drugs; dental suite; laboratory areas; post-operation recovery room; orthopedic central supply and storage; and rearrangement of facilities. Approval is recommended.

Total—Eastern Shore State Hospital \$ 89,000

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

DEPARTMENT OF MENTAL HYGIENE—(Continued):

(4) Springfield State Hospital:

- | | |
|---|------------|
| 7. Installation of fire sprinkler facilities in various patient buildings | \$ 487,000 |
|---|------------|

In 1970 \$200,000 were appropriated to install sprinklers in 10 wards and 4 buildings. The cost estimate was based on actual costs experienced prior to 1970. When bids were received, costs had tripled. The Department of General Services advises that the additional funds recommended herein are necessary to complete all wards and buildings at present prices.

- | | |
|---|--------|
| 30. Construction of roads, sidewalks and parking areas (second phase) | 80,600 |
|---|--------|

A master plan has been developed for necessary construction of roads, sidewalks, and parking areas determined to be required for safety of patients and to provide sufficient roadways and parking for employees and visitors. The plan is being implemented over a 5-year period in order of priority. This project is the second phase of a total of 5. Approval is recommended.

- | | |
|---|--------|
| 41. Study and preparation of detailed plans and specifications for necessary improvements to steam and water lines to Warfield Division, Geriatrics Building, and Men's "L" Building | 10,000 |
|---|--------|

Funds have been previously provided for similar study and renovation to utility lines in all other areas of the hospital. This project will provide detailed plans for necessary improvements and renovation of all main steam, hot and cold water lines in 4,300 ft. of tunnels having 6 lines and 7,800 ft. of tunnels having 2 lines.

Total—Springfield State Hospital	\$ 577,600
--	------------

(5) Spring Grove State Hospital:

- | | |
|---|---------|
| 8. Installation of fire sprinkler facilities in various patient buildings | 386,000 |
|---|---------|

DEPARTMENT OF MENTAL HYGIENE—(Continued):

Spring Grove State Hospital—(Continued):

This project initiates a 3-year program of installing sprinkler systems throughout the hospital in accordance with recent criteria published by the National Fire Underwriters Association. Funds recommended will cover C and G Cottages; Stone Cottage dining room; and red brick Cottages #1, 2, 3, 4. Approval is recommended to provide necessary protection and safety.

21. Equipment for new Medical-Surgical Building \$ 43,700

The new Medical-Surgical Building will not be completed during fiscal 1973. Therefore, only equipment requiring long lead time for delivery is necessary at this time. Funds herein have been recommended accordingly.

40. Design and preparation of preliminary plans and specifications for renovation of Garrett Building, including air conditioning 15,000

On completion of the new Medical-Surgical Building two years hence, Garrett Building will be available for renovation to accommodate approximately 100 infirmatory patients who need day-to-day bedside nursing care and necessary support and treatment areas. The Department's schedule for this project is 2 years planning and renovation in fiscal 1975. Recommend approval.

46. Installation of emergency generators and appurtenances 135,000

The plan for this hospital is to install 7 generators, each to serve one of seven groups comprising the entire hospital. Funds recommended herein will provide for the four most important groups, namely—Central Kitchen and Service Building Groups; Bland Bryant and Moylan Group; Medical-Surgical and Tawes Group; Dayhoff, White, and Hamilton Group.

Total—Spring Grove State Hospital \$ 579,700

DEPARTMENT OF MENTAL HYGIENE—(Continued):

Bond Funds General Funds

DIRECTORATE OF MENTAL RETARDATION:

- (1) Headquarters:
- 6. Design and preparation of preliminary plans and specifications for construction of a Western Maryland Mental Retardation Center (150 beds), Hagerstown \$ 75,000

The Directorate plans now call for establishing Regional Mental Retardation Centers to provide beds for patients requiring hospitalization. Patients that do not require hospital care are to be housed in 8-12 bed Group Homes located throughout each area and administered through the respective centers. The Group Home clientele are to use local facilities for training, therapy, education, etc. Plans for the new Salisbury 250-bed center are to be adapted for this project. This system is intended to reduce the number of patients at Rosewood and provide additional beds required. Approximately 206 Western Maryland patients are now in residence at Rosewood. This will be the pilot project for the new system.

- 6A. Purchase and renovate 2 residential homes in the Frederick Area (10 beds each) to be utilized as group homes for retarded 150,000

Estimated increase in operating expense:
 Salaries and wages \$51,100
 Other operating expense 11,000

It is intended that group homes, supported by a Regional Center, be acquired through purchase of existing houses and renovate as necessary. If existing houses capable of accommodating 8-12 patients are not available, new construction would be necessary. Remarks for project 6 above also apply to this project. Funds recommended herein are for purchase and renovation of two 10-bed homes as a start to determine if the program merits expansion.

- 13. Equipment for Regional Mental Retardation Center (250 beds), Salisbury 182,500

PROPOSED CAPITAL BUDGET

(2) Rosewood State Hospital:

26. Study and preparation of detailed plans and specifications for renewal of domestic water lines in various buildings	7,000
---	-------

The Department of General Services recommends that plans be prepared to verify the extent of work required and to arrive at a realistic cost estimate. Approval is recommended.

44. Installation of emergency generator for Long Term Care Colony	36,300
---	--------

This project is a part of a phased program to provide the necessary emergency electric power in order of priority. Inclusion of this project in the capital budget is recommended.

50. Study to develop roads, street lighting and parking needs	10,000
---	--------

An overall study is required to determine actual additional roads, parking spaces, and lighting required to accommodate vehicle and pedestrian traffic. Results of the study will be the basis for formulating a phased implementation program. Approval is recommended.

Total—Rosewood State Hospital	\$ 53,300
-------------------------------------	-----------

(3) Henryton State Hospital:

36. Enclosing 3 porches for day room area	
Construction	100,000
Equipment	8,600

All other porches formerly in the building have been enclosed. Experience has proven that the

PROPOSED CAPITAL BUDGET

Method of Financing

Bond Funds General Funds

DIRECTORATE OF MENTAL RETARDATION—(Continued) :

Henryton State Hospital—(Continued) :

enclosed porches have added materially to full time useable space which is badly needed. This project can be completed during fiscal year 1973. Therefore, equipment funds are required to provide for necessary equipment to fully utilize the additional space.

47. Installation of emergency electrical generator unit \$ 23,000

The primary purpose of this project is to replace the presently installed 208 volt emergency electric system with a 230 volt system. The Department of General Services advises this is a part of an overall program for the hospital. Approval is recommended.

Total—Henryton State Hospital \$ 131,600

(4) Great Oaks Mental Retardation Center:

12. Equipment for second phase construction (270 beds) 170,000

This project is scheduled for completion during fiscal year 1973. Equipment is required to place the building in operation when it is completed.

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

STATE DEPARTMENT OF JUVENILE SERVICES:

(1) Headquarters:

- 1A. To supplement the appropriation "Construction of a 30-bed Detention Center in Montgomery County" as shown on page 338 of the Acts of 1970; Section 8 of Chapter 101 of the Acts of 1970 being hereby modified to the extent that said work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose \$ 320,000

Estimated increase in operating expense:

Salaries and wages \$198,300
 Other operating expense 30,500

The appropriation for this project was originally funded in GCL 1970. Montgomery County donated the site for the institution. The increased funds required for this project result from a combination of higher construction costs and an increase in costs for on-site, off-site utility line and road extensions to the detention site.

3. Purchase and modification of youth residences:
- | | |
|--------------------|---------|
| Purchase | 350,000 |
| Modification | 75,000 |
| Equipment | 35,800 |

Estimated increase in operating expense:

Salaries and wages \$388,000
 Other operating expense 27,000

These youth residences will provide a homelike, open, yet regulated living situation for children who cannot remain in their own home and do not need to be institutionalized. Youth residences have an advantage over institutional care because they offer treatment in a situation more like normal community living. Youths will be able to use the available community rehabilitative services such as social, educational, vocational, psychological and medical facilities. Each home will accommodate from 8 to 14 youths.

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

STATE DEPARTMENT OF JUVENILE SERVICES—(Continued):

Headquarters—(Continued):

- | | |
|---|-----------|
| 15. Equipment for 30-bed Juvenile Detention Center in Montgomery County | \$ 22,600 |
|---|-----------|

Funds requested herein will provide the necessary equipment to place the institution in operation.

- | | |
|---|-----------|
| 25. Construction of a 100-bed Security Institution for Juvenile Delinquents | 2,500,000 |
|---|-----------|

Estimated increase in operating expense:

- | | |
|-------------------------------|-----------|
| Salaries and wages | \$916,500 |
| Other operating expense | 143,800 |

Approximately 15% of the juveniles committed to the State's training schools cannot adjust to nor be rehabilitated within the open program of the juvenile institutions. A relatively high percentage of the delinquent youths in the 16-18 year age group fall into this category. About 300 youths under 18 years of age are presently confined in one of our adult institutions. Some of those so confined are there because the juvenile institutions lack adequate secure custodial facilities to cope with the overaggressive offender. It is anticipated that the proposed security institution would reduce the number of juveniles required to be waived to adult courts. The treatment program at this institution will be focused on vocational training, remedial education, psychological and psychiatric therapy.

Total—Headquarters	\$ 3,303,400
--------------------------	--------------

(2) Montrose School for Girls:

- | | |
|---|---------|
| 39. Construction of Infirmary and Isolation Building (16 beds): | |
| Construction | 460,000 |
| Utilities | 10,000 |
| Site improvements | 20,000 |

Estimated increase in operating expense:

- | | |
|-------------------------------|---------|
| Salaries and wages | None |
| Other operating expense | \$3,200 |

STATE DEPARTMENT OF JUVENILE SERVICES—(Continued):

Montrose School for Girls—(Continued):

The institution is badly in need of an infirmary and isolation building. At the present time, the second floor of the administration building is used for this purpose. The configuration of these rooms do not adapt themselves to efficient infirmary use. The proposed structure will be a duplicate of the infirmary now under construction at the Maryland Training School for Boys.

53. To supplement the appropriation "Renovation of Wilson Cottage" as shown on page 1006 of the Acts of 1969; Section 8 of Chapter 409 of the Acts of 1969 being hereby modified to the extent that said work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose \$ 65,000

A serious problem was encountered when renovating the electrical and plumbing systems at Wilson Cottage. Funds available could complete only one floor of the building. This supplement will provide the funds to renovate the second floor of the cottage.

Total—Montrose School for Girls \$ 555,000

(3) Boys' Forestry Camps:

27. Construction of Replacement Kitchen—Green Ridge Forestry Camp 65,500

The existing kitchen is located in an old wooden Civilian Conservation Corps building which was constructed during the early 1930's. The structure is badly deteriorated. The electric wiring requires replacement as do the floors and wall insulation. The new structure will contain 2,350 sq. ft. of usable space including a kitchen area, dining area, food storage area, furnace room, and multipurpose room.

Total—Boys' Forestry Camps \$ 65,500

STATE DEPARTMENT OF JUVENILE SERVICES—(Continued):

(4) Victor Cullen School:

21A. To supplement the appropriation "Construction of Academic Building . . ." as shown on page 920 of the Acts of 1971; Section 8 of Chapter 425 of the Acts of 1971 being hereby modified to the extent that said work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose \$ 350,000

Estimated increase in operating expense:

Salaries and wages \$39,800
 Other operating expense 9,700

Additional funds are required to fund this structure. The building will be similar in design to the academic building at Boys' Village of Maryland. Male juveniles "in need of supervision" are now assigned to Victor Cullen. They rang in age from 9 to 18 years. This variation in ages creates a need for more instructional space than would normally be required at an institution of this size. The requested funds will make it possible to complete the construction of this critically needed structure.

22. Equipment for Academic Building 39,600

Construction of the new Academic Building should be completed during FY 1973. Funds recommended herein are required for the necessary equipment to place the facility in operation.

Total—Victor Cullen School \$ 389,600

TOTAL—STATE DEPARTMENT OF
 JUVENILE SERVICES \$ 4,313,500

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

DIVISION OF CORRECTION:

(1) Maryland House of Correction:

1. Construction of Hospital Building (24 beds)

Construction	\$	545,000
Utilities		20,000
Transformer		5,000
Site improvement		20,000
Equipment		22,000

Estimated increase in operating expenses:

Salaries and wages	\$33,000
Other operating expense	2,000

This project carries the Department's highest priority. The existing House of Correction hospital facilities are most inadequate. A metal prefab structure is recommended so that the hospital can be placed into operation quickly. The building will be 100' x 150' with approximately 15,000 sq. ft. of useable space. This proposed facility will provide 24 hospital beds, laboratories, outpatient clinic, pharmacy and dental space. It will serve the inmates from the House of Correction and the Correctional Camp system.

4. Design and preparation of detailed plans and specifications to convert the Old Power Plant to a Vocational Training Shop

5,000

Estimated increase in operating expense:

Salaries and wages	\$21,450
Other operating expense	1,000

Additional vocational training space is urgently needed in which to teach the inmates an employable skill. This project will convert the unoccupied old power plant into a vocational training facility. The skills taught in this facility will be oriented to the needs of private industry.

14. Installation of Ventilation System in the Laundry

40,000

The Division of Correction has agreed to increase the number of hours to be worked daily at the House of Correction Laundry. This

PROPOSED CAPITAL BUDGET

Method of Financing

Bond Funds General Funds

DIVISION OF CORRECTION—(Continued):

(1) Maryland House of Correction—(Continued):

agreement will increase the laundry volume and will require better circulation of air in the vicinity of the heat generating equipment such as mangles, washers and extractors. As the result of this increased laundry output, it will be possible to eliminate the requirement for a new million dollar laundry facility on the Eastern Shore.

Total—Maryland House of Correction \$ 657,000

(2) Maryland Penitentiary:

1A. Construction of new Dining Room, Kitchen and Bakery to include vehicular gate and guard tower in security wall:

Construction	2,012,000
Site and utilities	32,000
Equipment	50,000
Gate and guard post	40,000

Estimated increase in operating expense:

Salaries and wages	None
Other operating expense	6,000

The present kitchen and dining facility is very old and is almost impossible to keep clean. During the past year, both State and City health inspectors found the standard of cleanliness in the kitchen to be substandard. This proposed facility will eliminate the major structural deficiencies which caused the adverse ratings. The replacement building will be a single story brick structure containing 41,400 sq. ft. of space. The dining room will seat 400 inmates. To feed 1,200 prisoners at each meal, it will be necessary to have a continuous flow of diners through the serving lines. Upon completion of this new facility, the old dining room can be converted for use by another priority activity.

10A. Design and preparation of detailed plans and specifications to renovate West and South Wings 27,000

DIVISION OF CORRECTION—(Continued):

Maryland Penitentiary—(Continued):

This project will prepare detailed plans to renovate the plumbing in both the West Wing and South Wing of the penitentiary. Since only one wing can be renovated at a time, West Wing will be complete before work starts on South Wing. The project will renovate the shower area and the water closets, wash basins, water lines, and install a hot water line for each cell. Currently, hot water is delivered by bucket and ladled out to each cell. The inadequate shower facilities limit the number of baths an inmate can take weekly. The project will materially improve the living conditions at the penitentiary.

- | | |
|--|--------------|
| 11. Design and preparation of detailed plans and specifications to air condition the prison hospital | \$ 20,000 |
|--|--------------|

The penitentiary hospital serves the seriously ill inmates of the entire penal system. Very complicated cases may be sent to private hospitals. During the hot summer months, confinement in the prison's hospital wards is very uncomfortable. This project will improve the medical environment for the seriously ill inmates.

Total—Maryland Penitentiary	\$ 2,179,000
-----------------------------------	--------------

(3) Maryland Correctional Institution—
Hagerstown:

- | | |
|---------------------------------|---------|
| 13A. Construction of Gymnasium: | |
| Construction | 600,000 |
| Equipment | 20,000 |

This institution is a maximum security prison housing approximately 700 of the more aggressive and hostile inmates assigned to the penal system. There are not sufficient productive jobs available at the institution to allow each inmate an opportunity to participate daily in a

DIVISION OF CORRECTION—(Continued):

Maryland Correctional Institution—
Hagerstown—(Continued):

work program. This situation creates considerable idleness. The existing gymnasium is inadequate in size to accommodate the prison population. The proposed gymnasium will be a duplicate to the facility at the Maryland Correctional Training Center and will contain approximately 21,000 sq. ft. of space. The structure will provide sufficient additional recreational space to allow each inmate an opportunity to use a recreational facility daily.

Total—Maryland Correctional Institution—		
	Hagerstown	\$ 620,000
(4)	Maryland Correctional Institution for Women—Jessup:	
7A.	Renovation of Boiler Plant and installation of new boiler and emergency generator	410,000
	The boilers are very old and could become inoperable at any time. Since the system provides heat to the headquarters and all the living quarters at the institution, it must be replaced before it breaks down. The old system is coal-fired, however, the new system will be oil-fired to reduce air pollution. The emergency power generator for the institution is also to be located in the boiler plant building.	
8.	Design and preparation of detailed plans and specifications to renovate "C" Cottage	10,000
	The institution has embarked upon a program to renovate the living cottages at the women's institution. This is the second cottage to be renovated. Work on the first unit, Horri-gan Cottage, has not started as of this date. Since only one cottage can undergo renovation at a time, funds for detailed planning are all that is required at this time.	
13.	Convert old Kitchen-Dining Room Building into Vocational Shop	15,000

DIVISION OF CORRECTION—(Continued):

Maryland Correctional Institution for
 Women—Jessup—(Continued):

This building will be vacant when the Administration, Services, and Activity Building is placed into operation. The funds requested are to remove the equipment from the old kitchen and prepare the space for use as a vocational training shop. The new area will allow more inmates to participate in a vocational training program.

Total—Maryland Correctional Institution for Women—	
Jessup	\$ 435,000

(5) Maryland Correctional Camps

- | | |
|--|--------|
| 9. Installation of chlorine dispenser in the Sewage System—Eastern Correctional Camp | 18,000 |
|--|--------|

The camp must upgrade its sewage effluent prior to discharging it into the river. The chlorine dispenser proposed for installation at Eastern Correctional Camp will be similar to the one now in use at the Poplar Hill camp. This method of improving the effluent has proved to be very effective.

- | | |
|--|--------|
| 10. Design and preparation of detailed plans and specifications for construction of an All-purpose Building at Correctional Camp Headquarters—Jessup | 10,000 |
|--|--------|

The correctional camps have very little space in which rehabilitative instruction can be given. The proposed structure will eliminate this deficiency at the Correctional Camp Headquarters. The building will provide space for classrooms, a chapel, visiting rooms and recreational area. Room dividers will be used to allow maximum flexibility in the use of the space. A structure of similar design but smaller is planned for future construction at each of the three correctional camps and the Central Laundry.

Estimated increase in operating expense:

Salaries and wages	\$77,900
Additional operating expense	1,300

A site adjacent to the City of Berlin has been purchased for the New Berlin State Police Post. Staff currently stationed at the Salisbury Barracks will be assigned to the new post and will be responsible for policing Worcester County. The building will contain approximately 12,000 sq. ft. of space. The new Police Post will be similar to but slightly smaller than the recently completed Police Barracks in Annapolis.

3. Land acquisition and preparation of preliminary plans and specifications for Randallstown Barracks

30,000

The present barracks is old and very limited in size. When Route 26 is extended, it will pass through the site now occupied by the barracks. A number of proposed sites have been located for the new barracks, however, funds are required before any location can be finalized. The location selected should be on or near the Baltimore Beltway.

Facilities available to accommodate the students on the College Park Campus have not kept pace

UNIVERSITY OF MARYLAND—(Continued):

College Park—(Continued):

with the increasing enrollments. Space standards, which form the basis for calculating requirements for classrooms, offices, teaching laboratories and research areas, point up clearly space deficits which are critical. This building of approximately 135,000 gross square feet will provide urgent and critically needed facilities for the relief of crowded departments on the College Park Campus.

- | | |
|---|--------------|
| 8. Construction of a Lecture Hall Facility, including air conditioning of the existing Mathematics Building | \$ 1,517,000 |
|---|--------------|

Estimated increase in operating expense:

Salaries and wages	\$17,700
Other operating expense	14,900

In order to provide adequate lecture hall space to meet existing and future needs, it is proposed to construct a building containing two large lecture halls, each seating 300 students. The building will be constructed as an addition to the Mathematics Building in the Glenn L. Martin Institute of Technology. Facilities for handling large sections are in very short supply and it is expected that the Department of Mathematics alone will utilize these facilities to 80% or more of capacity in the first year of availability. Funds requested herein will permit construction of this 21,500 gross square foot facility and provide air conditioning also for the existing Mathematics Building.

- | | |
|--|--------|
| 9. To supplement the appropriation "Planning and preparation of detailed plans and specifications for an Industrial Education Building" as shown on page 926 of the Acts of 1971; Section 8 of Chapter 425 of the Acts of 1971 being hereby modified to the extent that said work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose | 20,000 |
|--|--------|

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

UNIVERSITY OF MARYLAND—(Continued):

College Park—(Continued):

The Department of General Services advise that due to escalation and other factors the funds appropriated for detailed planning for this facility are not adequate. Funds requested herein are therefore recommended.

11. Construction of an addition to the present Central Receiving Building:

Construction	\$ 520,000
Equipment	8,500

Estimated increase in operating expense:

Salaries and wages	\$20,500
Other operating expense	17,300

There exists a rather severe shortage of functional warehousing space on the campus. As a result, the University has been forced to lease 31,000 square feet of such space off campus. This arrangement is uneconomical since it is more expensive than local storage. Funds requested herein will provide for a storage facility of 25,000 gross square feet built in high bay configuration.

12. Design and preparation of preliminary plans and specifications for an addition to and renovation of the Engineering Building

78,000

Estimated increase in operating expense:

Salaries and wages	\$23,800
Other operating expense	20,000

The College of Engineering urgently requires additional space and there is also a need to upgrade the present classroom building. This building is one of the oldest on the College Park Campus that has not had a major renovation. To make the present structure functional and liveable, many changes are required. The addition of a fourth floor will provide about 17,740 assignable square feet needed to meet the expanding requirements of the College of Engineering. Funds requested will permit the prep-

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

UNIVERSITY OF MARYLAND—(Continued):

College Park—(Continued):

aration of preliminary plans for this very worthwhile project.

19. Extension of Utilities \$ 748,500

With new construction on this campus comes the requirement to extend utilities to these facilities. It is also necessary to correct deficiencies in existing utilities distribution on the campus. Specific projects include from installation of additional oil storage tanks, extension of electric and telephone service, relocation of water main and steam service to construction of a storm drainage system. Funds requested are required to accomplish this very necessary work.

20. Site improvements 480,000

This project includes sedimentation control and construction of roads, walks and landscaping of areas associated with new building construction on the campus to include the Zoology-Psychology Building and Undergraduate Library, Physical Education Building, Architecture Building and addition to the Chemical Engineering Building.

TOTAL—COLLEGE PARK \$11,221,300

(2) Baltimore City Campus:

1. Equipment for North Hospital Building 2,074,700

In the General Construction Loans of 1958, 1962, 1963, 1964 and 1967, the Legislature appropriated \$14,936,500 for the planning and construction of the North Hospital Building. These funds were augmented by \$8,069,686 of federal construction funds, and this building of 564,460 gross square feet is expected to be completed next fall. The General Assembly provided \$1,435,000 for equipment in GCL 1970 and federal funds of \$194,432 have also been provided. This request represents the balance of more than 15 year life equipment that will be required to place this facility in operation.

UNIVERSITY OF MARYLAND—(Continued):

Baltimore City Campus—(Continued):

2. Equipment for Dental-Pharmacy Building \$ 399,800

The funds to provide for the planning and renovation of this 59,450 square foot building were provided in the capital budgets for 1969, 1970 and 1971. The renovation should be completed and the building occupied during the summer of 1972. Funds requested are required to purchase equipment necessary to place the building in operation at that time.

5. Exterior Campus Lighting 112,000

Estimated increase in operating expense:

- Salaries and wages None
 Other operating expense \$12,500

The location of this campus in the heart of a metropolitan area necessitates the provision of adequate lighting for the security of personnel and property. In the past few years, the crime rate has increased significantly. The staff, faculty and students have been subjected to physical dangers and there are numerous recorded instances of assault, theft and attempted rape. Presently, theft of personal and University property has increased to an all time high. In GCL 1971, the Legislature provided \$50,000 to initiate a comprehensive campus lighting system. Funds requested herein will develop the system in its entirety and thereby give the campus sufficient illumination to improve the general safety of its population.

6. Construction of a Fire Stairway, University Hospital 292,000

Subsequent to the construction of this facility, fire regulations were issued with which compliance was not possible without some modification of the structure. Specifically, fire inspection of the building revealed that "C" Wing terminates more than sixty feet from the nearest stairway on floors seven through twelve.

UNIVERSITY OF MARYLAND—(Continued) :

Baltimore City Campus—(Continued):

This condition is considered a major fire hazard and the State Fire Marshal has directed that this stairwell be erected. Funds recommended are required to complete the project.

- 8. Design and preparation of detailed plans and specifications for Renovation of University Hospital, Phase I \$ 160,000

Estimated increase in operating expense:

Salaries and wages\$21,000
 Other operating expense 16,700

The construction of the North Hospital Building is planned so that each floor of this new building will be joined to a floor of the existing Hospital at the end of "A" Wing. Numerous changes in space allocations in the existing Hospital will be required as activities move, consolidate or expand. GCL 1971 provided \$35,000 for the preparation of preliminary plans. Funds requested herein will provide for detailed plans and realistic cost estimates.

- 9. Acquisition and clearance of land; the location subject to approval of the Department of General Services and State Planning 500,000

Estimated increase in operating expense:

Salaries and wages None
 Other operating expense\$75,000

As the population of the State continues to grow, the requirement for professional personnel will likewise increase. The enrollments of the professional schools will need to expand and thus the total campus will necessarily increase in size. Funds requested herein are required to continue the needed expansion through the acquisition of such properties as they become available.

- 10. Addition to Master Switching Station, Phase I.. 220,000

Augmentation of present electrical service is necessary for new construction on this campus.

PROPOSED CAPITAL BUDGET

Method of Financing

Bond Funds General Funds

UNIVERSITY OF MARYLAND—(Continued):

Baltimore City Campus—(Continued):

Heavy duty switch gears and feeders are long-lead items that must be ordered well in advance of their anticipated use. Funds requested will provide for the first phase of a two phase project totalling \$462,000.

12. Razing of the Outpatient Department Building.. \$ 110,000

This building was originally constructed in 1823. For some years now the potential hazard created by this old building has been common knowledge. A recent fire in this structure has compounded this critical hazard and the safety of those in and around the building has become a matter of concern. The requested funds will be utilized to defray the cost of razing.

Total—Baltimore City Campus \$ 3,868,500

(3) Baltimore County Campus:

1. Equipment for Academic Building No. 3 134,100

This 177,000 gross square foot facility is presently under construction and expected to be completed early in 1972. GCL 1971 provided \$455,800 for capital equipment. Funds requested herein are required to completely outfit the facility when it is completed.

2. Equipment for Library, Phase II 291,300

\$2,450,000 has been appropriated for the planning and construction of Phase II of the Library and this campus. Construction is progressing and the facility should be completed during the late Winter of 1972. Funds requested herein are required for equipment in order to place this new facility in operation.

5. Construction of Additions to Academic Building No. 2 3,853,000

Estimated increase in operating expense:

Salaries and wages \$ 67,200

Other operating expense 162,400

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

UNIVERSITY OF MARYLAND—(Continued):

Baltimore County Campus—(Continued):

The Academic Building No. 2 was built primarily to accommodate the arts and humanities. The space made available by these two wings supplements and is complementary to space found in the basic building. These two wings will add approximately 82,000 gross square feet to the space inventory. In view of the ever-increasing demand for courses in the arts and humanities, and in the overall growth of the student body on this campus it is expected that when constructed, this space will be fully utilized.

7. Site improvements \$ 105,000

As new buildings are completed on this developing campus, it is necessary to provide walk access to buildings as well as lawns, tree and shrub plantings. Projects to be accomplished from the funds requested include the Library, Phase II, Plaza Area and Dormitory No. 3.

8. Engineering drawings for Loop Road 55,000

Approximately one half of the loop road for the Baltimore County Campus has been constructed. Funds requested herein will provide for the engineering drawings required for the remainder of the loop road.

9. Extension of Utilities 150,000

This project is required to provide electrical distribution, sewer and water to new facilities on the campus. The funds requested herein will provide for the following specific requirements: electrical extension to Phase II of the Library Building and to the Stadium Area, campus lighting around new roads and parking areas, sewer, water and storm drainage to accommodate new construction areas and new roadways.

Total—Baltimore County Campus \$ 4,588,400

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

UNIVERSITY OF MARYLAND—(Continued):

(4) Eastern Shore Campus:

1. Equipment for Auditorium Building \$ 123,000

The Legislature has appropriated \$1,559,000 for the planning and construction of this facility which is now expected to be completed in October 1972. Funds requested herein are for necessary equipment to make this a fully useable and operational facility.

2. Renovation of Wilson Hall, including air conditioning:

Construction	245,000
Equipment	11,000

Estimated increase in operating expense:

Salaries and wages	None
Other operating expense	\$13,000

GCL 1971 provided \$8,000 to plan for the renovation of Wilson Hall which since 1949, has served as the principal classroom and laboratory building on the Eastern Shore Campus. With the completion of the new Science Building, rooms that have served temporarily as laboratories will be converted back to classroom use. In addition to the provision of central air conditioning, a general renovation will be undertaken. Recommend approval.

5. Design and preparation of detailed plans and specifications for a Computer Science, Math, Business Education Building 25,000

Estimated increase in operating expense:

Salaries and wages	\$13,400
Other operating expense	8,700

It is planned to establish a Computer Science curriculum on this campus which creates a requirement for laboratories, computer and computer related equipment, as well as faculty offices and classrooms. The space for the Business Education program is extremely limited. The Department of Business Education and Computer Science are related and will be able to work harmoniously in the same facility. Funds

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

UNIVERSITY OF MARYLAND—(Continued):

Eastern Shore Campus—(Continued):

requested will permit detailed planning for a building approximately 18,000 gross square feet.

6. Campus Mater Planning, contingent upon the University's development of an acceptable education program for the Eastern Shore Branch \$ 35,000

This campus has, for many years, been extremely limited in its growth and in the prospects for future growth. It has now been elevated to the status of a full branch of the University and because of a new vigor in its direction, an upgrading of its programs and personnel, it may be expected to grow in the years ahead. A well-developed Campus Master Plan will provide the basis for future development of this campus and will give a sound basis on which to proceed.

7. Extension of utilities 230,000

GCL 1971 provided \$150,000 for extension of utilities to new buildings, Phase I. Because of a change in timing in the construction of new buildings, it has become necessary to utilize a portion of these funds on the dormitory group. Additional studies have shown that increased lengths of runs are necessary for certain utilities, the major portion of these being steam service and sanitary sewers. Funds requested herein will provide for the necessary extensions.

8. Site improvements 161,000

With new facilities on this campus, it is necessary to provide access roads, walks and general landscaping. Specific facilities included in this project are the new Auditorium Building, Swimming Pool Addition to the Physical Education Building and the new Science Building. Funds requested will also provide for road and parking development and storm sewer extensions.

Total—Eastern Shore Campus \$ 830,000

TOTAL—UNIVERSITY OF MARYLAND \$20,508,200

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

STATE COLLEGES:

(1) Board of Trustees of the State Colleges:

1. State College Dormitory Fund, Phase IV \$ 2,500,000

The General Assembly in 1969, 1970 and 1971 appropriated a total of \$12,000,000 to establish a revenue producing base of 6,000 beds required to keep student housing costs at a reasonable level and at the same time provide a source of revenue for financing future residence halls on a self liquidating basis. However, escalation has taken its toll during the intervening years and instead of the 2,680 beds originally planned for construction with State funding, the \$12,000,000 already appropriated and the \$2,500,000 requested herein, will provide only for an estimated total of 2,140 beds.

Total—Board of Trustees of the State Colleges \$ 2,500,000

(2) Bowie State College:

1. Equipment for Auditorium-Classroom Building 287,100

This building is under construction with an estimated completion date of December 1972. Funds requested herein are required for equipment required to place the facility in operation.

2. Equipment for Physical Education Facility 50,100

The Legislature has appropriated a total of \$3,401,000 for the planning and construction of this 91,000 gross square foot facility. Funds requested herein are required to place the facility in operation when completed.

3. Construction of Physical Education Fields 134,800

Estimated increase in operating budget:

Staff expense \$4,000

Other operating expense None

Athletic fields on this campus are now limited to an outdoor cinder track and a temporary softball field. A new Physical Education Facility is under construction and in order to permit

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

STATE COLLEGES—(Continued):

Bowie State College—(Continued) :

physical education major students to develop necessary skills for teaching and the recreation program required to provide a proper balance for the students, athletic fields should be constructed on this campus. Recommend approval.

4. Completion of detailed plans and specifications for new Library, including air conditioning \$ 182,000

In the fiscal 1971 Capital Budget \$100,000 was provided in General Funds for the planning and preparation of detailed plans and specifications for a new Library, including air conditioning. The Department of General Services advises that due to escalation and other factors, additional funds are required. Recommend approval.

5. Construction of an addition to Maintenance Building:

Construction	573,100
Utilities	33,700
Site improvements	51,400
Equipment	10,300

Estimated increase in operating expense:

Salaries and wages	\$41,500
Other operating expense	43,500

GCL 1971 provided \$20,000 for detailed planning for this 15,700 gross square foot addition that will not only afford critically needed storage space but will also provide space for a Central Receiving Facility. In addition, the present office space for maintenance, security and other personnel is most inadequate. Funds requested herein will provide for the construction of this needed facility.

7. Site improvements and utilities:

Site improvements	170,000
Utilities	140,000

GCL 1971 provided \$282,000 for construction of a loop road, a parking lot for 130 cars, and a portion of the new entrance road to connect

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

STATE COLLEGES—(Continued):

Bowie State College—(Continued):

with the proposed Maryland Route 197. Funds requested herein will provide for lighting and final surfacing of this roadway. The utilities include extension to new facilities as well as an extension of a sanitary sewer line from the property line to the sewage treatment plant. Recommend approval.

8. Acquisition of land (app. 50 acres) \$ 250,000

State Road 197 has been realigned since the completion of the Master Plan for this campus. Thus an additional land purchase of approximately 50 acres is required to maintain the integrity of the total campus. This land is contiguous to the present campus and will extend to the proposed right-of-way of the realigned road. Recommend approval.

9. Extension of electrical distribution system 160,000

The Department of General Services advises that these funds are required to extend the electrical distribution system to new facilities on this campus including the new Physical Education Building, Dormitory and Auditorium-Classroom Building.

Total—Bowie State College \$ 2,042,500

(3) Coppin State College:

1. To supplement the appropriation for "Construction of an Auditorium-Classroom Building, including site improvements and air conditioning" as shown on page 642 of the Acts of 1968, as amended by Chapter 409 of the Acts of 1969 and Chapter 512 of the Acts of 1970 and as further amended by Chapter 425 of the Acts of 1971 providing supplementary construction funds; Section 8 of Chapter 435 of the Acts of 1968 and Section 8 of Chapter 409 of the Acts of 1969 and Section 8 of Chapter 435 of the Acts of 1971 are hereby modified to the extent

PROPOSED CAPITAL BUDGET

Method of Financing

Bond Funds General Funds

STATE COLLEGES—(Continued):

Coppin State College—(Continued):

that said work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose \$ 377,500

Estimated increase in operating expense:
 Salaries and wages \$38,000
 Other operating expense 40,000

Although no change has been made in the scope of this project, extensive cost increases, including those brought about by the adoption of minimum wage rates, and the implementation of sediment control practices have resulted in bid prices exceeding funds available. The Department of General Services advises this request is required to complete this 42,000 square foot facility in accordance with the original plans and program.

- 2. Equipment for addition to Gymnasium Building 24,000

The addition to the Gymnasium Building on this campus includes a swimming pool and a critically required maintenance facility in the lower level. Funds requested herein are required for equipment to place this addition in operation when completed.

- 3. Completion of detailed plans and specifications for an addition to Library 93,000

In the fiscal 1971 Capital Budget \$22,000 was provided in General Funds for the planning and preparation of detailed plans and specifications for an addition to the Library. The Department of General Services advises that due to escalation and other factors, additional funds are required. Recommend approval.

Total—Coppin State College \$ 494,500

PROPOSED CAPITAL BUDGET

STATE COLLEGES—(Continued):

(4) Frostburg State College:

2. Construction of new Library, including air conditioning:

Construction	\$ 5,095,000
Utilities	11,000
Site improvements	40,000

Estimated increase in operating expense:

Salaries and wages	\$147,500
Other operating expense	32,000

In order to provide additional library space required to accommodate a growing enrollment, initial planning was directed toward an addition to the present Library. The Campus Planners, however, recommend that a new Library be constructed and the existing facility be converted to an academic facility, primarily classrooms and offices which will be needed as soon as the new Library can be constructed. Funds requested herein will permit construction of a facility approximately 100,000 gross square feet.

3. Construction of an Addition to Dining Hall 300,000

Estimated increase in operating expense:

Salaries and wages	None
Other operating expense	\$3,000

Funds have been appropriated for a new dining hall to seat 350 students. However, with increasing enrollments an additional 400 seats is required to meet the projected demand. This Dining Hall addition will also permit the temporary closing of one kitchen which will also reduce food costs. Recommend approval.

4. Replacement of Heating Systems 200,000

Estimated increase in operating expense:

Salaries and wages	(—) \$4,500
Other operating expense	None

The heating systems serving Allegany Hall, Old Main, Faculty Hall and Garrett Annex are very old and urgently require replacement. Funds

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

STATE COLLEGES—(Continued):

Frostburg State College—(Continued) :

were appropriated in Fiscal 1971 and 1972 for engineering studies. Funds requested herein are required to make the necessary changes. It is believed that the replacements will result in a lowering of operating expense.

10. Expansion of Electrical distribution system \$ 254,000

With new facilities on this campus, the Department of General Services advises that the present electrical distribution system must be expanded. To provide the expanded electrical needs a new Master Sub-station is required for Cumberland Hall which in turn will service new facilities as they are constructed. Recommend approval.

Total—Frostburg State College \$ 5,900,000

(5) Morgan State College:

1. Equipment for Expanded Gymnasium Facility 360,600

The Legislature has appropriated a total of \$2,781,500 for the planning and construction of this building approximating 80,000 gross square feet. Funds requested herein are required for equipment necessary to place the facility in operation.

2. Equipment for new Library 539,000

The Legislature has appropriated \$4,100,000 for the planning and construction of this building approximating 109,000 gross square feet. Funds requested herein are required for equipment necessary to place the facility in operation.

3. Equipment for Education Building 241,700

The Legislature has appropriated a total of \$3,075,000 for the planning and construction of this building approximating 97,000 gross square feet. Funds requested herein are required for equipment necessary to place the facility in operation.

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

STATE COLLEGES—(Continued):

Morgan State College—(Continued):

4. Site improvements and utilities \$ 200,000

With new facilities on this campus, sidewalks, sodding, seeding and landscaping are required around each of the building sites. Included in this project is the Student Union, Education Building, Commerce Building and the Library. Recommend approval.

5. Construction of a Library-Fine Arts Plaza 200,000

Estimated increase in operating expense:

Salaries and wages \$7,700
 Other operating expense 500

GCL 1968 and 1971 provided planning funds for a Plaza which is to extend from the site of the new Library to the Fine Arts Center. Additions to the Fine Arts Center have been completed and the new Library is under construction. Funds recommended herein will provide for this new Plaza which will make the entire development a completed complex.

7. Construction of Athletic Fields and completion of roadway on south campus:

Construction 236,800
 Site improvements 8,600

Estimated increase in operating expense:

Salaries and wages \$2,000
 Other operating expense None

The Fiscal 1971 Capital Budget provided funds for detailed planning for athletic field development and \$40,000 for construction of Argonne Drive entrance road. The existing fields have been preempted by new construction on this campus and therefore these fields are required to support the physical education program. Funds requested herein are required for the new fields and for completion of the entrance road.

12. To supplement the appropriation for "Construction of an Education Building, including

PROPOSED CAPITAL BUDGET

Bond Funds General Funds

STATE COLLEGES—(Continued):

Morgan State College—(Continued) :

air conditioning” as shown on page 343 of the Acts of 1970; Section 8 of Chapter 101 of the Acts of 1970 being hereby modified to the extent that said work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose \$ 328,000

The Legislature has appropriated a total of \$3,075,000 for the planning and construction of this building. However, escalation has again taken its toll. The Department of General Services advises that this request is required to complete the facility in accordance with the original plan and program. Recommend approval.

13. Stabilization of Herring Run Embankment 70,000

Violent storms, particularly during the summer of 1971 have caused erosion of the Run in the vicinity of O’Connell Hall. Prevention of future erosion of the embankment and damage to O’Connell Hall itself will require the construction of walls, rip-rap and/or other protective devices on the embankment.

Total—Morgan State College \$ 2,184,700

(6) Salisbury State College:

1. Equipment for Addition to Library 362,000

The legislature has appropriated a total of \$2,007,000 for the planning and construction of this addition. Funds requested herein are required for equipment to provide for the effective utilization of the facility.

4. Renovation of Holloway Hall, including air conditioning:

Construction 1,651,000
 Utilities 25,000

PROPOSED CAPITAL BUDGET

Method of Financing

Bond Funds General Funds

STATE COLLEGES—(Continued):

Salisbury State College—(Continued):

Estimated increase in operating expense:

Salaries and wages None

Other operating expense \$10,000

Planning funds have been provided for the complete renovation of this building, constructed in 1925 and which has never had a major renovation. This facility which houses the principal administrative offices on the campus, has over the years been also utilized for student housing. With new dormitories, the students can now be moved and this renovation and remodeling will not only provide additional space for administrative purposes but will relieve the severe deficit in faculty office space. Funds requested herein are required to complete this very worthwhile project.

5. Design and preparation of detailed plans and specifications for a Storm Drain to Tonytank Creek \$ 8,000

No storm drainage system exists to carry rainfall runoff for the portion of the campus lying outside of the city limits of Salisbury. Construction of new facilities has compounded the problem and now considerable flooding of open areas and pavements occurs during storms. Funds requested herein are urgently required to determine the most economical solution of this problem.

6. Design and preparation of detailed plans and specifications for remodeling Caruthers Hall 50,000

Estimated increase in operating expense:

Salaries and wages \$ 6,000

Other operating expense 10,000

Caruthers Hall is the former Laboratory School on this campus which must be remodeled to provide additional college-level academic space to accommodate the projected enrollment. Funds requested herein will permit detailed planning for the project.

Equipment	\$ 618,300
Site improvements	143,400

The legislature has appropriated a total of \$5,271,300 for the planning and construction of this facility. Federal funding also provided an additional \$1,000,000 toward the cost of the building. Funds requested herein are required for capital equipment to place the facility in operation. \$150,000 was originally appropriated for site improvements for this structure. However, these funds were utilized in the award of the construction contract. Funds requested herein are required for restoration of the items deleted.

3. Equipment for Newell Hall 122,200

Funds have been appropriated for the renovation of this dormitory. Occupancy of the renovated dormitory is anticipated by Fall, 1972. Funds requested are necessary to purchase the required equipment.

6. Design and preparation of detailed plans and specifications for a Physical Education Facility .. 230,000

Estimated increase in operating expense:
 Salaries and wages \$462,600
 Other operating expense 146,100

Burdick Hall, the existing gymnasium on this campus does not adequately accommodate the existing enrollment. To alleviate this situation and to provide for the projected enrollment a new facility must be constructed. Preliminary planning funds have been provided. However, this request will permit detailed planning for another gymnasium the size of which will be subject to committee evaluation and determination.

PROPOSED CAPITAL BUDGET

Bond Funds General Funds

STATE COLLEGES—(Continued):

Towson State College—(Continued):

8. Additions to electrical distribution system \$ 194,000

GCL 1970 and 1971 provided a total of \$360,000 for additions to the electrical distribution system to provide an energy system with sufficient capacity to accommodate the new construction on this expanding campus. The Department of General Services advises that the funds requested are required to continue the work in Fiscal 1973.

10. Construction of a Parking Lot for 500 cars 155,000

Estimated increase in operating expense:

Salaries and wages None
 Other operating expense \$ 400

Parking spaces on this rapidly expanding campus remain in critically short supply. There was an enrollment increase of 639 students this past Fall. Funds requested will provide for construction of this badly needed facility.

11. Design and preparation of detailed plans and specifications for construction of athletic fields .. 20,000

Estimated increase in operating expense:

Salaries and wages \$ 9,800
 Other operating expense 15,600

There is existing at the present time a critical deficit in athletic field space. In addition to the present deficit, existing fields are being preempted by new facilities and/or parking. The requested funds will permit detailed planning for the new fields.

12. Remodeling of Linthicum Hall Basement:

Construction 137,200
 Equipment 8,900

Estimated increase in operating expense:

Salaries and wages \$4,700
 Other operating expense 2,700

Upon completion of the new Student Union, the Book Store which is presently utilizing space

STATE COLLEGES—(Continued):

Towson State College—(Continued):

in the basement of Linthicum Hall will move to the new building. The basement space can thus be reclaimed for classroom usage as was originally planned. Funds requested herein will provide for this necessary conversion.

16. Design and preparation of detailed plans and specifications for renovation of the Dining Hall Facility, including air conditioning \$ 32,000

Estimated increase in operating expense:

- Salaries and wages None
 Other operating expense \$1,300

The Snack Bar, Lounge, Student Offices, etc., presently located in this area will move to the new Student Union. Also, use of this building extensively during the summer months necessitates air conditioning. The growth of the college with the resulting strain on existing food service facilities compels this renovation and remodeling.

Funds requested herein will permit detailed planning for this project.

Total—Towson State College	\$ 1,661,000
TOTAL—STATE COLLEGES	\$16,878,700

PROPOSED CAPITAL BUDGET

ST. MARY'S COLLEGE OF MARYLAND:

1. Installation of air conditioning in Charles Hall .. \$ 75,000

Estimated increase in operating expense:

Salaries and wages None
 Other operating expense \$600

This project is required so that the college can fully utilize this building which houses the student union, bookstore, cafeteria and snack bar. Because of the expanded summer program on this campus, it will be necessary to utilize this building during the entire year. Recommend approval.

2. Construction of an Addition to Maintenance Storage Facility 72,000

Estimated increase in operating expense:

Salaries and wages None
 Other operating expense \$800

The college presently has several pieces of equipment, tractors, mowers, etc., for which there is not any covered storage space. In addition, the Fire Marshal has recommended that the college obtain a fire truck. The college also advises that they have recently experienced vandalism on this equipment for the lack of such a facility. Funds requested herein will provide for an addition approximating 3,250 gross square feet.

Total—St. Mary's College of Maryland \$ 147,000

PROPOSED CAPITAL BUDGET

MARYLAND SCHOOL FOR THE DEAF:

(1) Frederick Campus:

1. Equipment for Gymnasium Building \$ 16,600

The Legislature has appropriated \$1,532,500 for the planning and construction of the new Gymnasium Building. Funds requested herein are required for equipment to place the facility in operation.

2. Equipment for Vocational Building 190,900

The Legislature has appropriated \$1,468,500 for the planning and construction of the new Vocational Building. Funds requested herein are required for equipment to place the facility in operation.

3. Equipment for Intermediate Girls Dormitory 72,000

The Legislature has appropriated \$700,000 for the planning and construction of the final dormitory for this campus. Funds requested herein are required for equipment to place this 100 bed dormitory into operation.

4. Razing of old Academic Building 30,000

Upon completion and occupation of the new Academic Building on this campus, the old Academic Building will be of no longer use to the school. Razing the old facility will provide needed open space for the campus and at the same time remove a potential eyesore and security hazard.

6. Recreational facilities and site improvements—
 Gymnasium and Vocational Buildings 127,500

These facilities are to be constructed on school property across the street from the main campus at Frederick. With new construction, certain site improvements are mandatory. Additionally, play areas must be constructed in the vicinity of the Gymnasium. Included in this project are roads, parking areas, walkways, play areas, retaining walls, fencing and lighting. Recommend approval.

PROPOSED CAPITAL BUDGET

Method of Financing
Bond Funds General Funds

MARYLAND SCHOOL FOR THE DEAF—(Continued):

Frederick Campus—(Continued):

- 7. Extension of South Carrol Street and Mt. Olivet Boulevard \$ 25,000

With construction of the Gymnasium and Vocational Buildings, it becomes necessary to alter the elevation, widen and extend South Carrol Street and Mt. Olivet Boulevard which will serve as the primary artery to bring automobile traffic to this new part of the school campus. Funds requested herein are required to provide the State's share of the project in concert with the City of Frederick.

Total—Frederick Campus \$ 462,000

(2) Columbia Campus:

- 2. To supplement the appropriation "Construction of a facility for preschool-primary children, including utilities and site work" as shown on page 1009 of the Acts of 1969 as amended by Chapter 101 of the Acts of 1970 providing supplementary construction funds; Section 8 of Chapter 409 of the Acts of 1969 and Section 8 of Chapter 101 of the Acts of 1970 being hereby modified to the extent that said work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose 643,600

GCL 1969 provided the original appropriation for this facility. GCL 1970 provided an additional \$600,000. However, cost escalation have exceeded the appropriations and the Department of General Services advises that these funds are required to complete the building as planned and programmed. Recommend approval.

Total—Columbia Campus \$ 643,600

TOTAL—MARYLAND SCHOOL FOR THE DEAF.. \$ 1,105,600

MARYLAND HISTORICAL TRUST:

- | | |
|---|--------------|
| 1. Purchase of Poplar Hill Mansion, Salisbury, contingent upon the community assuming responsibility for all costs of operations and renovation | \$ 78,000 |
|---|--------------|

Poplar Hill Mansion is one of the oldest homes in the Salisbury area. (Circa 1800) The city and county officials have tentatively agreed to renovate, furnish and operate the home as a community center if the State will purchase the property and turn it over to the community. The local financial responsibility will amount to approximately \$60,000. Assignment to the community can be accomplished either by a long term lease or by transfer with an architectural easement and reverter clause attached.

TOTAL—MARYLAND HISTORICAL TRUST	\$ 78,000

Part III-A

MAJOR CAPITAL PROJECTS NOW UNDER CONSTRUCTION OR FOR WHICH CONSTRUCTION FUNDS HAVE BEEN APPROPRIATED

This section presents a tabulation of all major capital projects costing \$100,000 or more which are either under construction, or for which construction funds are available and the facility is in the design stage.

There are 130 projects in this category, representing an estimated total construction cost of \$230,333,500. Thirteen of the projects listed provide 3,251 additional beds for patients, inmates, students and employees at various State mental, juvenile services, correctional and educational institutions.

During the past year, thirty-seven major capital projects costing \$25,605,000 were completed and put into use. They are listed at the end of the tabulation.

**MAJOR CAPITAL PROJECTS (\$100,000) NOW UNDER CONSTRUCTION

- Building Security System—Phase I—Annapolis Complex
- Relocate Utilities Lines—State Office Complex—Baltimore
- Renovation Woodstock College Buildings and Installation of New Utility Lines
- White Oak Armory—Military Department
- Renovate “B” Building Dining and Kitchen Area—Crownsville State Hospital
- Addition to Medical-Surgical Building—Crownsville State Hospital
- New Electrical Sub-station—Crownsville State Hospital
- Central Patients’ Cafeteria—Rosewood State Hospital
- Adolescent Unit Building—Springfield State Hospital
- Installation of Two 70,000 lb. Boilers—Springfield State Hospital
- Fire Protection Sprinkler System—Springfield State Hospital
- Educational Wing to Nurses Home—Spring Grove State Hospital
- Conversion of coal fired Boilers to oil—Spring Grove State Hospital
- Fire Protection Sprinkler System—Maryland Training School for Boys
- Renovation of Field School Building and Addition to Gymnasium—Montrose School for Girls
- Convert Nurses Quarters to Staff Apartments—Victor Cullen School
- Installation of Electric Heating System—Victor Cullen School
- Power Plant—Maryland House of Correction
- Addition to Laundry Building—Maryland House of Correction
- Renovation of Cell Blocks, Hospital and Gymnasium—Maryland Correctional Institution
- Administrative, Services and Activities Building—Maryland Correctional Institution for Women
- Computer-Communications-Executive Building—Maryland State Police
- Annapolis State Police Barracks—Maryland State Police
- Addition to Fine Arts Building—Morgan State College
- Commerce Classroom Building—Morgan State College
- Zoology-Psychology Building—University of Maryland-College Park Campus

Addition to Foreign Language Building—University of Maryland-College Park Campus

Utility Lines—University of Maryland-College Park Campus

Addition to Hospital Cafeteria and Kitchens—University of Maryland-Baltimore City Campus

Air Conditioning University Hospital and Psychiatric Institute, Phase II—University of Maryland-Baltimore City Campus

Men's Physical Education Building—University of Maryland-Baltimore County Campus

New Roads and Parking Area—University of Maryland-Baltimore County Campus

Utility Lines—University of Maryland-Baltimore County Campus

Salisbury Transmitter—Maryland Public Broadcasting Commission

PART III-B

**POTENTIAL COMMITMENT OF FUTURE
CONSTRUCTION FUNDS CREATED
THROUGH APPROPRIATIONS OF
PLANNING FUNDS**

B-1. From Prior Construction Loans

B-2. From Proposed Appropriations in 1973 Capital Budget

PART III-B

POTENTIAL COMMITMENT OF FUTURE CONSTRUCTION FUNDS CREATED THROUGH APPROPRIATIONS OF PLANNING FUNDS

Planning funds is a term applied to an appropriation for:

- (a) Preliminary Planning Funds—any necessary study including the development of preliminary plans and specifications for a major construction project.
- (b) Detailed Plans and Specifications—the preparation of final working drawings which specify in detail the specific design and capacities for a construction project upon which basic bids are submitted.

By law, the preliminary plans and specifications must be available at the time that the General Assembly is requested to appropriate construction funds for a project. The State follows this practice in order to provide for: (1) needed engineering or other preliminary studies; (2) the development of better facility programs and plans; and (3) more accurate project cost estimates—all in the interest of obtaining the best facility for the least cost.

While it does not hold that construction funds will inevitably be provided in the first or second year following the appropriation of advance planning funds, there does exist a potential commitment of construction funds in the future.

The tabulation herein provided, covering planning funds in prior construction loans, discloses such a potential (based upon the Agency's cost estimate) approximating \$134,162,000.

In addition, projects for which planning fund appropriations are proposed in the 1973 Capital Budget will aggregate \$39,045,000 in projected construction costs. This figures does not include an estimated construction cost of a proposed new penal institution for the Department of Correction.

The total estimated costs indicated above are net of anticipated federal funds which are or may become available.

PART IV
CAPITAL PROJECTS PROPOSED

1973—1977

PART IV

DEPARTMENTAL CAPITAL NEEDS PROPOSED FOR FIVE-YEAR PERIOD, 1973-1977

This section lists all capital outlay needs, other than highways, which the various State departments and institutions initially requested be undertaken during the five-year period, fiscal 1973-1977.

The grand total of the projects requested in the calendar year 1971 for inclusion in the State's five-year capital program is \$583,347,900. This represents an average annual capital outlay of \$116,669,500, although the actual capital outlay proposed for a single year ranges from a high of approximately \$181,621,600 in fiscal 1973 to a low of \$78,369,200 in fiscal 1977.

The tabulation and summary which follow serve to give a longer range perspective as to future capital needs and to the overall level of required capital outlay by the State. It is important to note that none of the projects other than those recommended in the fiscal 1973 Capital Budget have been officially approved. However, it should be further noted that the various departments and agencies are being requested to give renewed impetus to a definition of their near term and future goals and objectives which will, hopefully, provide a more sophisticated, integrated five-year development plan, culminating in a long-range development program which will be updated annually. Also, it is to be remembered that those projects requested for fiscal 1973 which have been deferred or deleted for varying reasons affect the capital needs proposed in the ensuing years.

The projects herein listed which are included in the 1972 Capital Budget and which are to be financed with bond funds are designated by a dagger (†). The amount for each project recommended to be appropriated may differ from the sums requested by the various departments and institutions due primarily to adjustment in project scope, late additions and/or deletions or estimated costs. Cost figures represent cost to State only and do not include federal funds available or anticipated.

Italicized total figures shown for the Board of Public Works, Department of Health and Mental Hygiene, Department of Environmental Health, Department of Public Safety and Correctional Services, State Department of Education and the Department of Economic and Community Development are shown for memoranda purposes.

**SUMMARY OF CAPITAL OUTLAY NEEDS
FOR THE FIVE-YEAR PERIOD, FISCAL 1973-1977
